Richest Oil Field in Alberta.

## Did You Ever Stop To Think?

That your home merchant is a partner with you in building up the social and business life of your community? It is worth a thought, for it places buying in a new light.

If you owned a grocery store, would you send out of town for the food that appears on your table?

You may not own a grocery business, but you are part owner of a community, which represents a business that has to be kept going. Your partners in that ownership are your grocer, your hardware man, your dry goods man—every merchant and citizen of the community.

You derive dividends from that business—such as educational facilities, fire protection, police, protection, well kept roads—all of the advantages that a modern community supplies.

The capital you invest is represented by the taxes you pay. If the business is not run upon a sound financial basis, you increase your capital investment by paying more taxes.

The best way to keep taxes down is to promote local property through co-operation with your neighbors in the community business. If you buy out of town, the community merchant has greater difficulty in making his private business pay, and he more trouble in meeting his taxes. When he fails to pay, the other partners in the community business have to make up the deficit.

So, through buying at home you are helping to reduce your own taxes.

## KINSELLA BOY SHOT THROUGH KIDNEY BY .22 RIFLE

Gail Blain, ten year old son of Mr. and Mrs. Blain, of the Kinsella district, was accidentally shot the first of the week with a bullet from a .22 rifle while out hunting rabbits. It seems that while handling the gun in company with a younger companion the gun either fell out of his hands or in some other way was discharged with the result that the bullet passed through his body severing one of the kidneys. He was rushed to the Viking hospital where Dr. G. M. Little performed an operation and saved the lad's life, and at the present writing is doing quite well, and there are hopes of his recovery.

Mr. Richard Larsen has purchased the old Ford Garage building on Second Avenue east of the livery barn from R. O. Moore. Mr. Larsen intends starting in the implement business as soon as he can secure a stock of goods. Mr. Larsen has been farming for a number of years south of Irma and is well and favorably known in the Irma district. With the increased acreage being put under cultivation Mr. Larsen should enjoy a good business.

## TO DISCUSS FARMERS CO-OPERATIVE STORE

A meeting of the farmers of the Viking district will be held in the Recreation Hall on Wednesday, February 15th, for the purpose of discussing the advisability of starting a Farmers Co-operative store in Viking. The meeting will open at two o'clock P. M. All interested please attend.

## FEB. ROD & GUN AND CANADIAN SILVER FOX NEWS

Covering a wide field of outdoor activities, the February issue of Rod and Gun and Canadian Silver Fox News just published, is an exceptionally interesting number. Bonnycastle Dale, well known writer for the magazine, this month contributes an unusually interesting story on hunting trout on the Pacific and Atlantic coasts. An enlightening discussion of the Rainy Lake damming proposals is concluded by Arthur Hawkes.

Among other stories and regular departmental features are some splendid hunting and fishing articles as well as informative material on bird life, guns and ammunition, trapping and dogs. Samuel Alexander White's fine series of fiction on the old fur trading days in the North West is concluded with another thrilling complete story. Another interesting article is one by Robert James, descriptive of the island of Anticosti at the mouth of the St. Lawrence.

## CHURCH NOTICES AND ACTIVITIES

Sunday, February 12th

Subject "Are Foreign Missions Profitable?"

Irma—7:30 P. M.

Sunday School and Bible Class 11 a.m.

Singing—1:30 P. M.

Election of Steward.

Alma Mater—3 P. M.

Young Peoples Club in Irma Church Monday evening at 8 P. M.

There will be a Skating Carnival under the auspices of the Ladies Aid at the Rink Friday evening, Feb. 17. Prizes for the best dressed lady and gentleman; best comic lady and gentleman; best dressed boy and girl, teen age; best comic teen age boy and girl, best dressed boy and girl, twelve years and under; best dressed comic boy and girl twelve years and under.

## SCHOOL ESSAY

A young farmer in Warwickshire, finding his hedges broken and the sticks carried away during a frosty season, determined to watch for the thief. He lay many cold hours under a haystack, and at length an old woman, like a witch in a pull, approached and began to pull up the hedge. He waited until she had tied up her bundle of sticks and was carrying them off, that he might convict her of theft, and then, springing from his concealment, he seized his prey with violent threats.

After some altercation, in which her load was left upon the ground she knelt under her bundle of sticks, and raising her arms to heaven beneath the bright moon, then at full, spoke to the farmer, who was already shivering with the cold.

"Heaven grant that thou mayest never know again the blessing to be warm," He paid no attention to her words, and being a hard-hearted farmer, he dragged her into his house. He intended in the morning to send for the police. The poor old woman lay all night on the floor, but in the night the farmer had a dream. He dreamed that his farm had been heavily mortgaged and he had gone to ruin. He thought he wandered from village to village begging for food and fuel. This continued for many weeks until he came to the house where the old woman lived.

When he asked for food and a warm fire, she smiled at him, and said "Once you treated me roughly for taking a few sticks of wood to keep myself warm, but now you are in need." He did not say anything but took the warm welcome and food she gave him.

He awoke from his dream and dressing, went out into the kitchen where she was. It was now morning and after giving her breakfast he told her she could come and take as much wood as she liked. The old lady was bewildered, but saying nothing she went home.—Beulah Blade, Grade IX.

Note: The first two paragraphs of the above essay were given by the class and they were asked to continue the story to the end.

## NEW MODEL FORD CAR BEING SHOWN HERE

The new Ford car model made its appearance here on Saturday and every day since has attracted a great deal of attention at the McKeith & Jones garage, local dealers. It lives up to all the good things that has been said of it, being speedy, roomy, and well equipped throughout. In fact it is a new car from radiator to brake lining. The model on hand that was brought down from the city by S.W. Jones is a sport coupe, and those who have ridden in it or driven it, are highly enthusiastic. It will be well worth your time to call and give it the once over. Among many other improvements it has four wheel brakes; hydraulic snubbers; improved windshield glass, longer wheelbase, wire wheels and all the trimmings of a big car.

Very little interest was shown in the meeting of the ratepayers called for last Monday night. Evidently all of the ratepayers are satisfied with the way the village business is being conducted. The old council, Mr. Ross McFarland, Mr. James Hedley and Mr. Percy Jones were re-elected without any opposition.

## KINSELLA

The sad news was received here on Monday of the death of Mr. Elliott, who left here about a month ago for Rochester, Minn., to undergo an operation at the Mayo's hospital.

He leaves to mourn his loss a widow and one son, also his father, mother, brothers and sisters. The community extends their sympathy to the bereaved relatives in their loss.

Mr. and Mrs. D. Corbett left last Thursday evening for a trip to the coast. They expect to be gone about a month.

Mr. Jack Neal returned Saturday morning from Calgary where he attended the Creamerymen's convention.

Mrs. Hawkesworth of Vermilion who has been spending some time with her daughter Mrs. J. Neal, returned home Monday evening. A surprise birthday party was held at the home of Mr. and Mrs. E. C. Williams on Saturday evening, the occasion being the 12th birthday of their daughter Dorothy. A very enjoyable time was had.

Mr. Cooper of Phillips shipped a carload of livestock from here on Tuesday.

Mrs. Charlie Thorson returned home from Viking hospital on Tuesday.

## U. F. A. NOTICE

Mr. A. T. Aitken, U.F.A., Director for Battle River will hold a series of meetings on the following dates:

ORINDALE—Monday, February 27th at 8 p.m.

ROSEBERRY—Tuesday, February 28th, at 8 p.m.

IRMA—Wednesday, February 29th at 8 p.m.

JARROW—Thursday, March 1st, at 8 p.m.

## TEN YEARS AGO

From Irma Times, February 8th, 1918

Mrs. J. Watson was visiting with friends at Viking.

Mr. J. O. Clark returned after visiting in Calgary.

Mr. J. C. Reed was laid up with the pleurisy.

Mr. and Mrs. N. L. Fuder and family were visiting friends at Camrose.

## FIVE YEARS AGO

From Irma Times, February 9th, 1923

Mr. Jas. Hedley was in Edmonton. Son arrives at the home of Mr. and Mrs. Robert Kasten.

Mr. J. W. Wyatt of Edmonton was spending a week at Irma.

Mr. and Mrs. R. A. Larsen were at Edmonton.

Mr. S. Miles and J. J. Armstrong were delegated to the trustees convention at Calgary.

Mrs. H. Peterson returned after spending two months at Acme.

The U. F. A. was holding picnic shows.

Mr. T. Dorman was in Winnipeg.

Mr. D. R. Blair of Edmonton and Miss Alice Irving of Pictou, N. S. were married at the home of Mr. and Mrs. R. L. Eaton.

A young bride asked her husband to copy off a radio recipe she wanted, he did, but got two stations at once, one broadcasting physical exercise, the other the Household recipe. Result:

Hands at hips. Place one cup of flour on shoulders. Raise knees and depress toes and mix thoroughly in one half cup of milk. Repeat six times.

Inhale quickly one half teaspoon full of baking powder; lower the legs and mash two boiled eggs in a sieve. Exhale; breathe naturally and sift in a bowl.

Attention! Lie flat on the floor and roll the white of an egg back and forth until it comes to a ball. In ten minutes remove from the fire, and rub smartly with a rough towel, "Breathe naturally. Dress in warm flannels and serve with fish soup.

A Valentine Tea will be held at the home of Mrs. P. J. Hardy on Tuesday February 14th from 3 to 5 P. M. Bring your aprons. If you did not get one, it will be provided at Mrs. Hardy's. Everybody invited to attend.

## 1928 AUTO LICENSES.

Now is the time to get that new set of auto license plates for your car.

## School Reports

### Irma and District

#### IRMA PUBLIC SCHOOL REPORT FOR JANUARY

Senior Room

Grade VIII.—Eva Condon 79, Vera Thorpe 72, Vera Herbert 62.

Grade VII.—Anna Peterson 76, Cliff Smallwood 75, James Fleming 74, Robt. Maguire 72, John Schonert 60.

Grade VI.—Vera Hatch 82, Elsie Stinson 76, Mary Jones 70, Bessy Sharkey 53, Dorothy Glasgow 56, Sam Congdon 50, Mary Stinson 49, Murray Gulltner 48, Agnes Lattner 43, Stanley Gulltner 42, Clarence Barber 41, Don Mathison 11.

Grade V.—Nina McGregor 75, G. O. King 74, Ray Locke 73, Forest Cio 65, Jack Peterson 63, Harold Cio 62, Ted Thomsen 62, Ralph Schonert 60, Dolton Herbert 58, Leslie Robertson 58, Bonnie Maguire 45, Leo Briault 40.

Florence McDowell, Principal.

Junior Room

Grade I.—Louis Barber, Harvey Gulltner, Ronald Thurston, Norman Campbell, Clifford Jones, Percy Congdon, Eldon Herbert, Arthur Peterson, Alphonse Briault, Doreen Hatch, Geo. Lattner.

Grade II.—H. Eda Briault, James Sharkey, Clarence Larson, Harry Lattner.

Grade III.—Rosa Sharkey, Ethel Tate, Bobbie Charter, Marion Thorpe, Annie Babchuk, Clarence Carter, Yvonne Knudson, Gunnar Larson, Mildred Hill.

Grade IV.—Frederick Thurston, Fern Stinson, Lois Cio, Roy Blade, Eileen Robertson, Robert Gulltner, Ernest Briault.

Grade V.—William Millum, Aletha Knudson, Ina Mathison, James Mathison, Albert Glasgow, Orville Wright, Ralph Congdon, Harold Barber, Roy Lattner.

—Gertrude Magrath

#### SUNNY BRAE SCHOOL REPORT FOR FEBRUARY

The following is the standing of the pupils of the Sunny Brae school for February.

Grade VIII.—Elizabeth Higginson 89, Clara Miles 59, Willie Hubman 55, Stuart Fenton 35.

Grade VI.—Kathleen Knowles 79, Rena Fenton 70, Charles Seton 62, Mary Bacon, ungraded.

Grade IV.—Mary Miles 68.

Grade II.—Tommye Bacon, ungraded.

Jessie Douglas, Teacher

#### ROSS SCHOOL REPORT MONTH OF JANUARY

Grade VIII.—Irene Archibald, av. 68.83.

Grade VII.—Raymond Stinson 57.16

Grade VI.—Bertram Nicoll, 74.1, Leela Nash 64.8, Clayton Peterson 58.5.

Grade V.—Mary Kennedy, absent.

Grade IV.—Olive Larson 73.55.

Grade III.—Hazel Nicoll 84.28.

Grade II.—William Nash 79.85, Allen Anderson 75.55, Albert Larson 74.57, Ellen Anderson 64.55.

Grade I.—Senior—Gladys Larson first, Martin Jonason, second.

Grade I.—Junior—Mary Burno, first; Fred Burno, second.

—Alma G. Miles, Teacher

#### UP TO DATE MARY

Mary has no little lamb,

Like she had long years ago.

But she has a pair of calves.

That she delights to show.

They go with her to school today.

As faithful calves should do.

Where Mary draws a teacher's pay.

For imparting knowledge true.

Ye pedagogues of other days

Would deem her calves too shocking.

But Mary says it always pays.

To buy a high-priced stocking.

And Mary wears expensive gowns.

That are very light and airy.

Not so showy for their cost.

But they show a lot of Mary.

Boy! Page Daddy Browning!

Mr. A. Kelly, of Salt Lake City, Utah, spent the week end with the Knudsons in the Coal Springs district. Mr. Kelly was a former neighbor and chum of the Knudson boys when they lived in South Dakota some twenty years ago. He is now interested in pure bred live stock breeding and is considering locating a branch in Alberta.

## Gardening Booklet For Farmers

Illustrated Handbook Issued by Bank of Montreal for Farmers and Others.

A booklet on gardening written especially from the farmers point of view, and dealing with the special conditions to be found both in Eastern Canada and on the Prairies, is now being distributed by the Bank of Montreal to its customers and friends.

Like the previous booklets on farming subjects issued by the Bank, the booklet covers every phase of the subject in simple language, and yet gives the methods and results proved by scientific experiment and research to be the most profitable. The value of the instruction given is immensely enhanced by reproductions of close upon 150 photographs and diagrams.

Every farm, it is stated in the introduction, ought to have at least one acre of the very best soil on the place devoted to growing the home supply of fruits and vegetables. The farm garden should not be crowded into a tucked-up patch near the house, but should be planted in long straight rows far enough apart to cultivate with a team and field cultivator.

"Then every time you hitch up a team to cultivate the grain or potatoes, go through the garden; give it a good cultivation. It will take only a few minutes and mother won't have to break her back pulling weeds, and the boys won't have to stay home on Saturday afternoon and hoe when they ought to go fishing."

The directions in the book have to do with the laying out of the garden, the proper preparation of the soil, the choice of various varieties of vegetables to suit conditions of soil and climate, the selection and testing of seeds, the raising of young plants in hotbeds, outdoor planting, cultivation and irrigation, insect pests, and storage. Practically every variety of vegetable is covered in the book, and there is a section also dealing with small fruits.

While written primarily for the farmer, the booklet is valuable to amateur gardeners everywhere, in both town and country. Copies may be obtained, without charge, at the local office of the Bank of Montreal.

**PURE - BRED - TO - LAY  
CHICKS**

ALEX TAYLOR'S HATCHERY,  
WINNIPEG.

Sergeant Stewart of the Wainwright attachment of the A. P. P. was in Irma last Friday and Saturday when he had three citizens up before the J. P. for violation of Provincial Act. Friday night one trapper was fined ten dollars and costs for trapping without a license. Saturday morning two more citizens were up on three charges each, for setting snares, trapping and killing prairie chickens and partridges out of season. These were each fined \$10.00 and costs on each charge, the total fine amounting to \$70.00. Mr. M. D. Askin, J. P. heard the cases.

Each of the young ladies was charmingly gowned in ivory flat crepe prettily trimmed with crepe-de-chene and carried a bouquet of orange blossoms. The ceremony was witnessed by Mrs. G. Pybus and Mrs. E. A. Seal. All of the contracting parties are well known residents of the Irma district and heartiest good wishes are extended to them for their future happiness and success. After a short honeymoon in the city they will take up their residence at Irma.

**QUALITY MERCHANDISE**

## Field Seeds

It may seem a little early to talk Seeds, but now is the time to think of your needs in —

**BROME GRASS, WESTERN RYE  
SWEET CLOVER**

Let us have your requirements in these seeds in time to catch a car loading for distribution in Northern Alberta shortly.

It means a freight saving of about 60c a hundred.

In clean, bright Aluminum

## Government vs. Private Ownership

It does not call for the vision of a seer, or the wisdom of a seeress, nor a seventh son, to realize that a battle royal is looming up on the horizon of Canada's national life involving acceptance of one or the other of the two policies stated in the heading of this article. It will be a battle of giants, with not merely millions or tens of millions, but hundreds of millions of dollars at stake.

The final stages of this gigantic financial battle are now being waged over the subject of control and development of vast water-powers in various parts of the Dominion. In more than one instance these are linked up with schemes of canalization, as, for example, the Great Lakes-St. Lawrence waterways scheme, and the long-discussed Georgian Bay Canal project. Although both of these undertakings must be carried out in the East, they are matters of vital interest to Western Canada.

Financial, commercial and industrial interests in Montreal and Toronto may be interested, and more or less directly affected by the deepening of the channels of navigation between the present head of ocean navigation at Montreal, and the head of the Lakes ports of Port Arthur and Fort William, and the more vital concern of these financial magnates is centered in and upon the development of the huge water-powers which will be made available as part of this canal construction.

The West, on the other hand, is more concerned about the greater waterways to come and the effect which the deepening of the water channels between the head of the Great Lakes and the Atlantic seaboard will have on freight rates, both by water and rail, on the huge exportable surplus of Western products.

So far as the Great Lakes-St. Lawrence project is concerned, it is not really a domestic matter for Canada. It is an international matter, inasmuch as a portion of the St. Lawrence belongs jointly to Canada and the United States, and the construction of the proposed deep canal system will affect approximately forty million of the people of the neighboring republic.

Eastern financial interests, whose real concern is to secure private control of the vast water-powers to be developed, are busy raising the bugaboo of United States interference in Canadian affairs. United States control of Canadian resources, and are among all the possible dangers of canalizing the St. Lawrence. The old, worn-out stock arguments used at the time of the two-party campaign are beginning to be trotted out once more. The old flag is to be waved, and all and sundry who do not see eye to eye with the financial magnates looking with a covetous eye at this wealth of water-powers are to be charged as traitors to the Dominion.

There is some evidence, too, that, as on former occasions when questions of great national moment were up for discussion and decision, attempts will be made to cloud the real issue by again raising deceptive cries of race and creed, and seeking to set one section of the Dominion against another.

Too frequently in the past, with great national policies at stake, the people of Canada have allowed themselves to be swayed by these cries and have been made the victims of their own shortsightedness and foolishness in placing heads to such unworthy appeals. Now that Canada has largely put these things into the background, and is moving forward to a development and prosperity unsurpassed in its past history, it is to be sincerely hoped that any and all such ignominious attempts will receive no quarter from the overwhelming mass of the Canadian people; that, as a people, they will put their foot down, and put it down hard, upon any such campaign, the originators of which are the real enemies of and traitors to Canada.

We are not proposing to discuss the respective merits of public and private ownership. But we would most earnestly ask the people of Western Canada to be on their guard, and in the discussions which are bound to take place within the next few years to keep their minds particularly on the facts of the case, and not be influenced one way or the other by catch cries, sectional, sectarian, or partisan appeals. It is the national good of all Canada, present and future, that is at stake.

## Experimental Farm For North

Establishment In Meadow Lake District Has Been Approved

Interest in the settlers in the far North of the North-West federal constituency is the news that the federal department of agriculture has sanctioned the establishment of an experimental station at Meadow Lake. The farm will be selected, and will be put in operation during the coming summer. The telegraph line built this year, linking up the 50 mile stretch between Meadow Lake and Loon Lake is now in operation, and is already proving a boon to the people in this remote part of the province. With better farming facilities and improved conditions for the settler, a development of the agricultural possibilities is expected, resulting ultimately in improved railway and highway service.

It takes a warp to make a lazy man get a move on himself. All it has to do is to back up against him and push.

Carols were first sung in the thirteenth century.

## Millions Spent On Roads

Canada Has Built 7,436 Miles In Last Few Years

Out of a total of \$4,415 million of road provided for under agreement authorized by the Canada Highways Act of 1919, 7,436 miles has been completed at the end of the fiscal year ending March 31, 1927. This is shown in the annual report of the Commissioner of Highways.

This mileage was constructed under the provisions governing the Federal subsidy whereby the Dominion Government undertook to furnish 40 per cent. of the cost, the province taking care of the remainder.

The estimated subsidizable cost of the highways was \$48,900,972.

## WOMEN WHO ARE WEAK

Gain New Vitality By Building Up the Blood

There are many women who pass their days in a constant state of weariness. They have barely sufficient energy to enable them to perform their manifold duties. Often they have an aching head, a miserable pain in the back and limbs that feel as heavy as lead. The whole trouble is due to bloodlessness. No woman need suffer in this way. It is easy to obtain a supply of rich blood by taking Dr. Williams' Pink Pills. The new blood created by these pills rapidly builds up the system, and backaches disappear, energy returns and the joy of living is felt once more.

First of these statements is given by Mrs. Ed. Lanoire, Stoney Point, Ont., who says: "For a long time I had been in a very miserable condition, always feeling tired out, sleepy and weak. The least work about the house would leave me helplessly tired and nothing that I did seemed to give relief. Believing that a real might do me good, we moved to town, but, contrary to expectations, instead of getting better I was growing steadily weaker. One day while talking to a neighbor, she urged my taking Dr. Williams' Pink Pills, telling me that her daughter had been in a condition much like mine. This persuaded me to try this medicine, and I have much reason to be grateful that I followed her advice. After the use of a few boxes of the pills, there could be no doubt that they were helping me. As I continued their use my energy and strength came back and now I am doing all my own work and feeling in the best of health. For this splendid condition I must give thanks to Dr. Williams' Pink Pills." The pills are sold by all druggists, or you can get them by mail at \$1.00 a box from The Dr. Williams' Medicine Co., Brockville, Ont.

## Making Place Homelike

Manager Of New York Hotel Had Right Idea

"My wife has been ill, please make our room look homelike and inviting," wrote a prospective guest to the manager of one of New York's leading hotels the other day.

An assistant manager was assigned to carry out the man's idea.

And here is what he did:

He purchased the latest magazines and newspapers and draped them carefully about the room.

He placed a vase containing fresh flowers on a table in the room.

He left a box of candy open on the lounge.

He arranged the chairs and tables and ornaments in a "homely" way and then spent half an hour trying to find an agreeable set to suit the artificial fireplace he had fitted into the most convincing spot.

Awful Asthma Attacks. Is there a member of your family who is in the habit of coughing and wheezing? No service you can render him will equal the bringing to his attention of Dr. J. D. Kellogg's Asthma Remedy. This remarkable remedy relieves its reputation upon what it has done for others. It has a truly wonderful record, covering years and years of success in almost every part of this continent, and even beyond the seas.

Motor Driven Sleighs

Plans are under way for the establishment of a regular line of transportation by sleighs driven by airplane motors between Omsk and Tars, Siberia, according to advices received by the Department of Commerce. The route to be covered is 200 miles long. Sleighs are expected to maintain a speed of thirty to thirty-five miles an hour.

The Experience of Mrs. Roy Brown is Well Worth Reading

Peterboro, Ont.—"I was in a miserable state of health. My nerves gave way completely. I could not sleep, had backaches and was completely exhausted—so weak and sleepy and tired that I was compelled to give up and take to my bed. I was advised to try Dr. Pierce's Favorite Prescription, as nothing I had used helped me. By the time I had taken one bottle I was able to be up and around, I kept on taking it and was completely restored to health. I cannot say enough in praise of the 'Favorite Prescription' for the wonderful help it gave me."—Mrs. Roy Brown, 272 Main St.

## Manitoba Agricultural College Re-Union

400 Ex-Students To Celebrate the Coming Of Age Of the Institution

Friends and ex-students of the Manitoba Agricultural College are preparing to celebrate the coming of age of that institution at a re-union to be held February 16 and 17, for it is twenty-one years ago since the charter class graduated.

Re-unions come with unfailing regularity in M.A.C. circles, but this one, on account of its historic significance, is to be the daddy of them all. A big committee under the energetic leadership of J. H. Evans, deputy minister of agriculture, is making a special drive to get in all ex-students, particularly those who went through the mill on the old site at Tuxedo, now the military barracks. The first evening of the re-union will be given over to a banquet. Efforts are being made to secure the attendance of Dr. W. J. Black, Montreal, President Reynolds, of O.A.C., and John Bracken, the three ex-presidents of the college. Mr. Evans estimates that at least 400 ex-Aggies and Household Science graduates will be on hand, every one of them cautioned to leave seriousness at home.

The afternoon of the second day will be spent in visiting the classrooms and laboratories at St. Vital. Students now in attendance at the college stand prepared to take the concert of graduate athletes who may be harlequin any notion that they can still curl or play basketball. A dance at the college will wind up proceedings.

Another Victory For Science

Danger Of Collapse After Pneumonia Crisis May Soon Be Overcome

Forecast of an imminent achievement that medical science had achieved another great victory was made before the Canadian Club at Toronto, by Prof. J. C. McLennan, of Toronto University.

Danger of collapse following a pneumonia crisis, caused by inability of the body to attain requisite temperature, may be overcome as a result of recent observations in the General Electric laboratory in Schenectady, N.Y.

It was recently observed that operators experimenting with a long measure water apparatus built for radio suddenly had a tremendous rise in temperature. It soon became apparent that if these waves could be controlled and applied to sodium chloride in the blood there was a marked absorption and the temperature was increased to a given point. It is now believed by application of these waves any known temperature required in the body may be attained.

A pleasant medicine for children is Mother Graves' Worm Expeller, which is excellent for driving worms from the system.

Compulsory Wheat Pool

United Farmers Of Alberta Are Opposed To This Idea

By an overwhelming majority delegates to the recent annual convention of the United Farmers of Alberta, held in Calgary, defeated a resolution calling for the establishment of a compulsory wheat pool, providing the next sign-up exceeded 65 per cent. of the farmers of the province.

D. H. Smith, Ceres, Alta., sponsor of the resolution, stated pool members should not pursue the "ineffective" policy of trying to educate non-pool members, but that the Government should be called upon to pass legislation forcing them into line.

C. C. Reed, Wetaskiwin, remarked it was an easy matter to suggest a compulsory wheat pool, but another problem to put it into practical operation.

It should be the object of the pool members to make conditions as favorable for non-pool members that they will be glad to join without legislative coercion," he declared.

Savings deposits in the chartered banks of Canada at the end of 1927 totalled \$1,460,000,000 or over \$140 per head of the population of the Dominion.

When a woman reaches the limit of her argument she gets angry.

Recipes For This Week

(By Betty Barbery)

Cardinal Gratin Salad

1 package lemon-flavored gelatin.

12 cups boiling water.

1 cup canned beef juice.

1 cup celery, sliced.

1 cup beets, sliced.

1 cup Spanish onions, cut in 1 green pepper, shredded.

1 teaspoon salt.

Dissolve gelatin in boiling water.

Add beef juice. When cold, add celery, beets, onion, green pepper and salt.

Pour into individual molds. Turn out on lettuce, serve with Mayonnaise dressing. Serves eight.

Fifteen-Dollar Pie

1/2 cup sugar.

2 tablespoons flour.

1/2 tablespoons melted butter.

1/2 cup lemon.

1 egg yolk.

1 cup milk.

1 egg white.

1/2 cup grains salt.

Mix sugar and flour, add melted butter, lemon juice, egg yolk slightly beaten, milk, egg white stiffly beaten, and salt. Bake in one crust, and cover with meringue or not, as desired.

Bakers Are Good Swimmers

Is there any connection between swimming and baking? asks a writer.

Miss Mercedes Gleitze is the daughter of a German baker who lived in England for some time, but who is now employed at Frankfurt, Wiesbaden.

The German Channel swimmer of last year, is a baker, and his wife, who won the Berlin women's swimming cup, takes an active part in his business.

This Frenchman, Michel, who holds the record for swimming from France to England, is also a baker.

Headaches may be swiftly and safely relieved by an Aspirin tablet. A most efficient remedy, and there's no after effect; its use avoids much needless suffering. Try it next time; see how soon its soothing influence is felt. Just as helpful when you have a cold; neuralgia, neuritis, rheumatism, lumbago. Just be certain you get real Aspirin—the genuine has Bayer on the box, and on every tablet. All druggists, with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means later manufacturers, to insure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

Headed List Of Winners

All First Prizes Taken By Herman Trelle At Calgary

Herman Trelle, of Wembley, Alta., internationally famous seed exhibitor, showing specimens of Marquis and Garnet wheats at the annual Provincial Seed Fair held at Calgary, secured first prize in every class including the grand championship event in wheat.

Mr. Trelle was exhibiting wheat from zone two, the Northern part of the province, and in all the four classes from spring wheat to hard selected he headed the list of winners.

Edinburgh is to be commended on its decision to sell its relics of the Great War, and give the money to charity. Better that children should have food and clothing than have machine guns to play with.

"Buckley's" for Throat Health  
A slip night and morning relieves soreness and hoarseness, and prevents more serious developments. A little of Buckley's—40 doses for 10 cents—is an economical guarantee of healthy throats for the whole family. Pleasant to take—Instant in action—positive in result. All druggists sell it.

W. K. Buckley, Limited, 723 142 Mutual St., Toronto 2

Acts like a flash—A single slip proves it

## Sale Of Forest Products Is Big Factor In Keeping Trade Balance With U. S.

Canada's far flung line of forest industries stands out as perhaps the most striking feature of the Dominion's industrial landscape.

Only when one realizes what an enormous volume of commerce these forest industries support, and what a dominant role they play in keeping Canada's trade with the United States on a fairly even keel, can one clearly appreciate what a huge stake the Canadian people have in forest production.

These hundreds of mills together form the main supporting pillar of Canada's export trade with her neighbor to the south. The mounting sales of forest products have enabled the Dominion in recent years to keep her trade with the United States from becoming altogether lopsided. Last year Canada sold to the United States roughly \$242,000,000 worth of

wood and paper products, this class of goods representing more than half of the total value of our exports to that country.

How long Canada can continue to export forest products at such a rate is a question which few persons would care to try to answer, for there is a pretty unanimous agreement that the Dominion's forest resources are being steadily and rapidly depleted. In the light of this situation, efficient forest protection and management must take rank as one of Canada's commanding problems. It is a question which commands the active concern not merely of those who find employment in forest industry, or of those whose capital is invested in that field, but of every individual and institution interested in seeing that the Dominion's commercial position is maintained on an even keel.

## Television and Radio New Perfected Device Makes It Possible To Both See and Hear Performers

The magic wand of science, passing over the factory of the General Electric Company, at Schenectady, N.Y., disclosed to a small group of radio engineers, scientists and newspapermen, a vision of the future of radio broadcasting—a future designed to bring to broadcast fans the sight as well as the sound of the radio performers.

Sitting in comfortable chairs in three Schenectady homes, revelers from the company's broadcast studio, the visitors were enabled both to hear and see the studio program.

Simple twists of the dials on the home television sets brought to them the minute reproduction of the characters who appeared before the microphones, even to the curl of cigarette smoke from their lips and the blinking of their eyes.

The sound of their voices was heard in the usual way through a loud-speaker supplementing the visual apparatus.

## WILL TRY OUT NEW WHEAT

Reward Will Be Tested By Saskatchewan and Alberta Farmers

Experiments in the cross-breeding of wheat of different varieties that are carried on by experts at the staff of the Department of Agriculture of Canada have produced still another strain that is declared to be suitable for growth in the prairie section of the Dominion. This new strain, notes the Quebec Chronicle-Telegraph, is known as Reward wheat. It has been revealed that the sample of wheat with which the Manitoba Agricultural College won a first prize at the Royal Winter Fair in Toronto was of the Reward variety. And, more recently, Hon. W. R. Motherwell, Minister of Agriculture, has disclosed that the sample of hard spring wheat with which Mr. Herpin Trelle, of Winnipeg, Alberta, won a first prize at the International Exhibition in Chicago was of the same variety.

Hon. Mr. Motherwell announces that a thousand bushels of the grain have been distributed to some four or five hundred farmers in Saskatchewan and Alberta to be tested on their farms and also, no doubt, to be multiplied so that larger supplies of it may be available as seed next year. The new wheat has been subjected to certain tests already on experimental farms, on the experimental plots of agricultural colleges and on the farms of certain seed growers. These tests are said by Mr. Motherwell to have shown that Reward has the strongest straw of possibly any known wheat, that it ripens earlier than Marquis wheat, but not quite as early as Garnet, that it is less liable to rust infection than any other varieties, and that it yields a flour "without spot or blemish."

## Reindeer Industry

Company Lease Big Area In McKenzie River Territory

Reindeer meat is fast finding its way to the dining rooms of Western Canada. If the plans of the Dominion Reindeer Company are successful this organization, which is now actively engaged in the reindeer business in Alaska, is moving 1,000 fawns in the spring to a lease of 200,000 acres in the McKenzie River territory, which is being granted by the Federal Government. It is estimated that sales of reindeer meat in 1929 will be \$80,000, increasing to \$150,000 in the following year.

## An All-British Airship

An airship firm here announces its intention of building a machine which it is hoped will be the first absolutely all-British airship to land in Canada. It will be able to carry 30 persons in addition to a crew of six or ten. Its flying range will be 1,500 miles but it will compass the Atlantic by sailing at the Azores.

In after years the girl with the beautiful auburn hair becomes a red-headed wife.

## Canadians Are Urged To Turn Their Gaze Northwards For Great Future Developments

### Every Farm Potential Aerodrome Vision Of The Aeroplane In Daily Use On The Farms Of Western Canada

That aviation today is rapidly taking its place in the economical life of Canada, linking up airports and remote areas by fast aircraft which have a speed range from 70 miles to 200 miles per hour, disregarding the natural topographical barriers and eliminating time and distance, is the opinion of W. S. McCordell, a Canadian air pilot with much experience in flying in Western Canada. He points out that the era of aerial transportation may have a profound effect on the destiny of the Dominion and the remote areas now far from communication and contact with social centres may, through the medium of a network of airways, become in terms of time a few hours distant from the largest cities.

In view of the advent of the light aeroplane which costs no more than a good automobile, and in view of the ease with which flying can now be mastered the stretch of farms in Western Canada may be only a short hour or so away from the city landing ground, independently of the conditions of roads the aeroplane may carry the rural dweller over the sky lanes in the span of an evening, permitting him to attend the theatre and return again the same night. Certain areas which would ordinarily wait long for economic conditions that will permit the construction of roadways, will find in the aeroplane a vehicle that will enable them to reach desirable centres.

All these possibilities and a host of others greatly affecting rural life hinge on the use of the aeroplane in the daily life of the people as a vehicle for fast travel. In the rural areas of Western Canada every farm becomes a potential aerodrome and the cities and community centres only a short flight away.

## Plan Industries Fair

Everything Made In Great Britain Will Be Exhibited

Almost everything Great Britain makes, from huge electrical equipment for a power house down to the daintiest jewelry, will be seen at the British Industries Fair, which is to be held simultaneously in London and Birmingham from Feb. 20 to March 2, 1928.

The aim of the organizers is to make each section thoroughly representative of its own branch of British industry and to establish the fair more firmly as an annual commercial event of first class importance—the manufacturer's means of launching new products and establishing new contracts, the trade buyer's means of keeping in touch with the latest developments in British production and of taking a complete survey of that section of it which interests him most without having to make a tour of the country.

## Ship Live Cattle To Japan

Forty Head Obtained In Alberta Were In Prime Condition

Shipments of dressed beef in the half or quarter carcass have been exported to Japan from Vancouver for several years past and consignments of pure-bred and dairy cattle have also been made. But what is believed to be the first shipment of live beef cattle was made from Vancouver recently on the steamer Evliven by the Vancouver Livestock Exchange. The shipment consisted of 40 head, averaging 1200 lbs. each, which were obtained in Alberta, it being found impossible to get them in British Columbia. The animals, which will be slaughtered on arrival at Kobe, were in prime condition, but, never having had a rope on them since they were branded; the longshoremen had a lively time getting them on board and tied up in their stalls.

## Ensures Safety

The trains on the Paris underground railways are being fitted with an ingenious invention by which it will be impossible for them to leave a station unless all the doors are closed and locked. No signal to start will be given by the guard; he will simply press a button. Unless everything is in order the electric motors will not respond to the starting handle.

Tom: "How did you enjoy your automobile trip?"  
Jim: "Fine."  
Tom: "And the scenery?"  
Jim: "Wonderful! I saw three sign boards I had never seen before!"

The map of Canada is gradually being unrolled northwards, and by bit the secrets that have hitherto lain hidden in that vast empire to the north of the 60th parallel are yielding themselves up to investigation and research.

It is only within the last few years that Canadians have definitely turned towards the great possibilities for expansion of the Northland and have satisfied themselves that the promise of the Northland areas of the country are barren and uninhabitable, is like most popular beliefs, utterly erroneous. With a quiet determination they have tackled the problems of exploring and exploiting the territories beyond the 60th degree of latitude, and have within the past year committed themselves to spending many millions of dollars in development work in that part of the continent.

The establishment of post offices, police posts and customs houses in the Northern Islands off the Canadian mainland has been steadily pursued; the most Northern administrative post in the world is that of the Royal Canadian Mounted Police at Pelly Bay, on Ellesmere Island, 700 miles south of the North Pole. There is no end to the surveys that are being carried out among the islands themselves and to the investigations conducted into every feature, geographical and biological, that these islands contain.

Coming nearer to civilization, Canadians are seen creating for themselves new transportation routes and new outlets to the ocean. At the moment an "expeditionary force" of flying men are operating in the Hudson Straits, that spacious channel which connects the inland ocean, Hudson's Bay, with the Atlantic.

This force has for its duty the making of observations in daily flights over vast expanses of water in order to note the tidal conditions, currents, prevailing winds, ice and all other elements that enter into navigation. Three air stations are located in the straits, one at Port Burwell at the extreme point of the Labrador Peninsula, the second at Wakeham Bay on the south shore and midway up the straits, and the third at Nottingham Island, in Hudson's Bay itself, at its western entrance.

Day after day flights are made and reports transmitted by wireless to the Canadian government.

The whole idea behind this is that the government should possess all information as to how far navigation can be lengthened, for although the Hudson Straits have been navigated for three hundred years and at one time were the main highway to the Canadian West in the days of the old fur-trading companies, the development of the southern lanes of traffic left that route far behind.

Line up with the latest developments in the definite effort now being carried out to finish the Hudson's Bay railway—a line which will when completed, run from a point in Saskatchewan, near the Manitoba border, to Fort Churchill on Hudson's Bay.

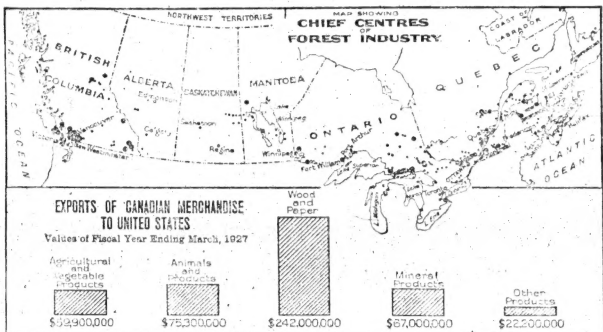

As originally planned the road was to end at Port Nelson, but an exhaustive investigation into the merits of the two terminals resulted in Fort Churchill being decided on. It will lengthen the railway by nearly 100 miles, but the report of engineers who made a study of the situation indicates that Churchill has many advantages not enjoyed by Nelson and that, despite the 100 miles of railway building, the expenditure in the end will be smaller.

This line goes right into the heart of the Canadian West, bringing it only a few hundred miles from the sea coast. Exploration is being pushed forward. At the beginning of this year a small expedition will start out from Ottawa to study the fauna of 35,000 square miles of territory which the government has set aside as a game sanctuary. This region lies between the Great Slave Lake and Chesterfield Inlet, near the junction of Hanbury and Thelon Rivers. It has been traversed by many exploring parties, but the region is so vast that much remains to be told of it.

Canadian statesmen are urging their compatriots to turn their gaze northwards, and the next few years should witness some great developments in that portion of the American continent.

Girl: "I want a nice book for an invalid."  
Librarian: "Something religious?"  
Girl: "No, not now. It's her convalescent."

Next to the United States, Spain claims the highest average wealth.

## WHEN DAYLIGHT INCREASES

Lengthening Process Does Not Begin Until Middle Of January

W. G. Sibley writes as follows in the Journal of Commerce: When we remark that "the days are beginning to lengthen" we do not mean that any time is added to the twenty-four hours which constitute a calendar day, but that the period between sunrise and sunset increases. It is a popular belief that the lengthening begins on December 21 or immediately after, and that the increase begins at both ends of the day; that is, that the sun rises earlier and sets later. This is an error. The sun really begins to set later on December 14, but it does not begin to rise earlier until about the middle of January. For instance, in the northern states the sun rises at 7:18 and sets at 4:38 on December 21; and on January 12, rises at 7:22 and sets at 4:55. The day (solaron) shortens four minutes in that period, while the afternoons lengthen seventeen minutes, a net increase between sunrise and sunset of thirteen minutes. Not until after January twelve does the "day" lengthen at both ends.

In the six months after December 21, sunrise speeds up from 7:18 to 4:51, increasing the length of forenoon two hours and forty-seven minutes; while the afternoons lengthen from 4:38 to 7:32, a gain of two hours and fifty-four minutes. This daylight increases five hours and forty-one minutes in the northern states.

## Area Sown To Crops

The total area sown in Canada to the principal crops in 1927, was 54,672,810 acres. Wheat occupied 22,400,153 acres; oats, 13,239,963 acres; barley, 3,205,713 acres, and the remaining 16,826,981 to a variety of other crops such as rye, flaxseed, corn, peas, potatoes, alfalfa, mixed grains, etc.

The smoke over the city of Prague is estimated to contain 79 tons of solid matter daily.

## WHAT A SITOMACH

"Is it true that Ernest has consumed the dowry of his wife?"  
"Yes. 26 cakes of soap and 200 kilos of old iron."—Pola Mela, Paris.

W. N. U. 1717

## Winnipeg Newspaper Union

The one-piece frock shown here is a simple and exceedingly smart style. The graceful jabots and the collar are very flattering, and the long sleeves are gathered to wristbands. No. 1625 is in sizes 34, 36, 38, 40 and 42 inches bust. Size 38 requires 3 1/2 yards 39-inch, or 2 1/2 yards 54-inch material. Price 25 cents the pattern.

German Subs Discovered

Sunk in the Baltic off Windau Harbor, when they came into collision during the war, two German submarines, from which there were only three survivors, have been discovered by fishermen. The latter have recently hauled in their nets portions of the wreckage and ship's skulls and other bones. Divers have been sent down and have reported the submarines to be apparently lifeless.

A flea can jump 200 times the length of his body.

## When a Sparrow Falls

Save the Birds and Destroy the Insect Pests

According to scientists, we are now on the verge of a struggle between the insect world and mankind. If each insect born lived until its natural death, it would not be long before fields and woods would be bare and our source of food gone.

One bird devours hundreds of insects in a day, and millions in a lifetime. Millions of birds devour well the problem is too difficult to solve, but at any rate, they enable us to overcome the insects that remain.

Worth remembering, isn't it? Particularly when the rifle of the small boy is pointed toward one of our feathered friends.

The world's output of petroleum for 1927 is estimated at 1,229,500,000 barrels.

## West Pays Visit to East

More and more every year Canadians are exploring Canada. From the East—Montreal and Toronto—the Canadian Pacific Railway sends special trains right across the Dominion to Victoria, returning by routes different to those by which the outward journey was taken and thus giving easterners a more thorough idea of the land and cities of the west. In the other direction, from west to east, the flow is almost equally great by reason of the large number of westerners who travel across Canada to take ship overseas for the Christmas holidays. But the "Survivance Francaise" is something different to this. In this case, some hundreds of French-Canadian settlers in the west make the trip back for a week or two to the land of their origin, the Province of Quebec. They arrived at the Windsor Street Station of the Canadian Pacific Railway in Montreal, and from there went to Shawinigan, Sherbrooke and Quebec City, where they were enthusiastically feted by local organizations, municipal, government and ecclesiastical bodies. Photograph shows this season's party assembled in the Windsor Street Station just after their arrival in Montreal recently. The lady in white uniform of the old French regime was a guard of honor drawn up to greet the party and come from a local Montreal school.

## Selection of Dairy Cattle Breeds Influenced by Shows

A good typical Arabian size

Putting on the finishing touches

Many a man who is undecided as to the breed of dairy cattle that he will select has been influenced in making his decision by the animals of a particular breed that he has seen in public.

The individual breeder secures a great deal of advertising as the result of exhibiting at fairs, or in offering good animals at public sales. It gives people a chance to see and know the kind of stock that a man is breeding and paves the way for future business.

It is essential that special care and attention be given dairy animals far in advance of the time that they are to be exhibited or sold. Exhibiting or selling animals publicly in their every day clothes is poor advertising and puts them at a disadvantage when the competition is keen. It takes several weeks to put a dairy animal in good show condition and what applies to fitting for show applies as well to fitting for sale.

It is important that the dairy animal to be exhibited or sold be in good flesh. A good covering of flesh adds to size, increases smoothness and indicates that the animal is thrifty and in good health. Dairy animals being fitted need extra feed. Stabling and blanketing are great aids in putting the hair and hide in condition. By stabling in summer, the animal is protected from the hot sun which makes the hide harsh and stiff to the touch. A roomy box stall that is kept clean and well bedded

provides desirable quarters. Continuous blanketing helps keep the animal clean, sweats the hide, thus improving its handling qualities and makes the hair lay to the body. The blanket need not be expensive but it must be tied on securely.

Every dairy animal that is to be exhibited should have the hair clipped from the entire body about three weeks previous to the date of the show or sale. This will get rid of the old hair and allow a new, even growth to develop which will greatly improve the appearance and increase the selling value of the animal.

A point often overlooked in the preparation of a dairy animal for show or sale is that of training to lead and stand properly. An untrained animal cannot display its good points to advantage if it combats the efforts of the attendant to exhibit it properly. A little time spent each day in training to handle properly will save effort and embarrassment at the show or sale and increase the financial return. While in the show or sale ring, the man in charge of an animal should have one main thought in mind, namely that of showing the animal to advantage. By this is meant that when it stands, its feet are properly placed, back straight and head alert. Any movement on the part of the attendant or animal should be as graceful as possible. Until the ribbons are placed or the auctioneer's hammer falls, take no chances.

## SUPPLY OF REWARD WHEAT EXHAUSTED

The demand for seed of Reward wheat, a new and promising variety originated by the Dominion Experimental Farms, has been so keen, that hundreds of applications for seed cannot be filled this year, as the supply of seed is now entirely exhausted.

Those who desire to obtain seed of this variety for sowing in the spring of 1929 should get it as soon as possible with their nearest Experimental Farm and obtain information as to sources of supply. There will probably be upwards of 1000 acres of Reward seeded in the spring of 1928. From 250 to 300 farmers will have from 2 to 3 acres each. The rest of the area occupied by this wheat will be located chiefly on Dominion Experimental Farms in the three Prairie Provinces.

A report on the performance of Reward on the above Farms will be prepared next winter and will probably be available for the consideration of Western wheat growers before the seeding season of 1929. This report should indicate to a considerable extent at least, the districts in which Reward may be regarded as a promising variety. It is always advisable, however, to withhold enthusiasm for any new variety until it has been thoroughly tried out by farmers for two or three years at least.

—L. H. Newman, Dominion Cereals.

## COUNCILLORS JOB GOES BEGGING IN VIKING

The town hall was well filled with a gathering of ratepayers and citizens last Monday evening when the financial report for 1927 was read and discussed and other village business given an airing. Some discussion took place in regard to road improvements, especially in the way of cement sidewalks for Main street, and additions to the plank sidewalks for the side streets. The meeting was quite unanimous in this matter. Decisions will have to be sold if the scheme is carried out by the council this summer approximately to the amount of from five to six thousand dollars, to make a good job of it.

After eight o'clock, nominations were called for three councillors and one member of the hospital board. Mr. J. E. Kringsen, the present member who has held the position since the hospital district was formed, was the only nominee, and he was therefore declared elected by acclamation by the returning officer, W. McAthey.

Nominations for councillors were rather slow, and when the hour was up, only two nominations had been received, namely P. P. Nyhus and H. G. Thunell. This necessitates another nomination which date of meeting will be announced later.

It is hoped that at this meeting enough nominations will be received so that an election can be held. There is considerable work to be done this year, and it is up to every bona-fide ratepayer to take an interest in town affairs and shoulder some responsibility when called upon.

## Here and There

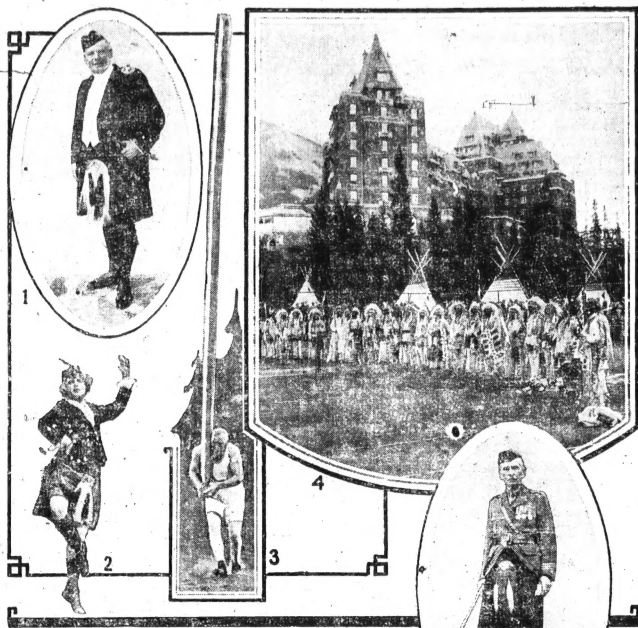

Another barometer of the state of Western Canada's agricultural progress is the sale of school lands in the Prairie Provinces which in 1927 were the best on record. In all 480,408 acres were disposed of for a total of \$8,983,957, representing an average of \$18.70 per acre. The lowest prices obtained was \$7 per acre and the highest \$79.

Appointment was announced recently of R. F. Angus to be assistant superintendent of the C.P.R. Montreal Terminals. Mr. Angus, who joined the Canadian Pacific Railway as a clerk in 1919, is the grandson of R. B. Angus, one of the creators of the system, and nephew of Sir Vincent Meredith, chairman of the Bank of Montreal.

Ten-year-old John Willie Barbour travelled recently alone from his aunt in Los Angeles to his father in Glasgow, a distance of about seven thousand miles, in care of C.P.R. train and boat officials from Chicago on. John thought the climate here was little different to California and wore no overcoat or had left it packed in his trunk, but he changed his mind at Montreal where he struck sub-zero weather. He arrived safe and sound and will come back in the spring.

A paradise for the outside camper will be ready next summer when the government finishes the new camp ground in the Rocky Mountains Park. At this time a mile of Bark, on Tunnel Mountain. The camp, which on its old site last July accommodated 11,553 persons, is specially popular among prairie farmers between seeding time and harvest. Charge is only a dollar for a party for three weeks, and running water, garbage removal, dinner shelters, electric light and even pay telephones are provided for campers.

## Reviving Canadian Musical Wealth

(1) Lt.-Gov. Randolph Bruce, of B.C., who attended the Festival. (2) A step in the Highland Fling. (3) Pictorial Indians grouped on the grounds of the Banff Springs Hotel. (4) Ralph Connor, who preached at the open-air service in the Sun Dance Canyon.

According to general comment throughout the country, the second decisive step towards reviving and preserving the wealth of music, indigenous of this country, has been achieved with the conclusion of the Highland Gathering and Festival of Scottish Music held at the Banff Springs Hotel, Banff, Alberta, during the first week of September.

Not only in Canada but in the United States and Great Britain, have newspapers and current magazines commented most favorably upon this musical event, the first venture along these lines being in July when the Canadian Folk Song and Handicraft Festival was held at the Chateau Frontenac, Quebec City.

Proof of the interest taken in them across the water was given recently when the Right Hon. Stanley Baldwin, Premier of Great Britain, commented upon the Folk Song Festival held in Quebec. This event was one of the first of public interest touched upon by the Premier after his arrival in Canada. Mr. Baldwin observed with pleasure the success of the festival and stated that events of that kind were invaluable in keeping alive the old-time customs, songs and handicrafts which he was sorry to observe, were wont

to be forgotten in the rush and bustle of the present day.

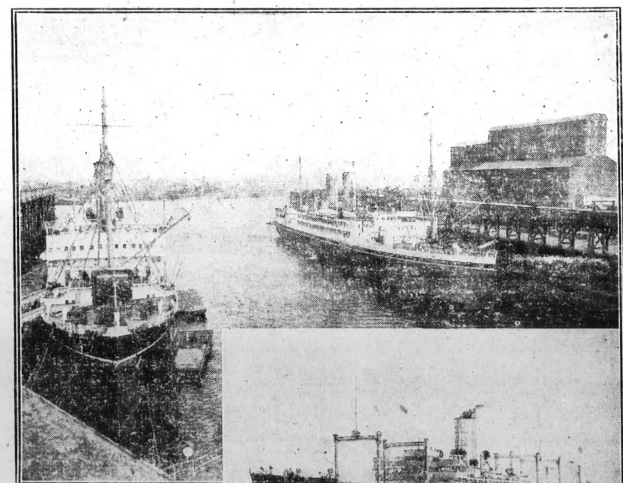

The Festivals at Quebec and Banff have been staged through the generosity of E. W. Beatty, chairman and president of the Canadian Pacific Railway Company. Organizing work in connection with them has been of pioneer nature as these festivals are the first of their kind to have been staged in Canada. This work was undertaken by J. Murray Gibson, general publicity agent of the Canadian Pacific whose personal interest largely accounted for their success. Many of the old folk songs which were featured at the Canadian Folk Song Festival being translated by him.

Scots in Canada played a memorable part in the development of the country, their names having prominence in many engineering, fur-trading and exploration enterprises—such men as Fraser, Mackenzie, Thompson, and many others of the past generations who penetrated the mountains of the West. It was here in the same mountains, unrivaled in the world for beauty, that the Scottish Festival was held and for which hundreds gathered from all parts of the country to attend. The gathering was of a national character, as each of the seventeen

Scottish residents in Canada had pipers present to compete for the highest honors. The artists themselves were in most cases Scots of no mean artistry. The festival of music was supplemented by a full program of Scottish games and tests of prowess, which proved one of the outstanding features of the three-day gathering.

While many colorful events have taken place at this famous mountain resort the Scottish Festival was perhaps the most picturesque, for in addition to the brilliant plaids of the Highlanders, were to be seen the traditional gay dresses of the Indians who gathered from the Blood and Stony Reserves to witness the events. They watched with keen interest the whirling dance steps of the Scots and were awed by the skill of the pipes. In turn they demonstrated their old-time ceremonial songs and dances described by the early Scottish explorers, such as Sir Alexander Mackenzie and Alexander Henry.

## First of New Fleet at Saint John

Saint John Harbour

Completing her maiden trip across the Atlantic, the "Beaverburn" new fast cargo liner for the Canadian Pacific Railway fleet, docked at Saint John, N.B., to receive the official welcome of several officials of that company, among whom were, W. R. MacInnes, vice-president in charge of traffic, and W. A. Wainwright, assistant to the chairman, Canadian Pacific Steamships Limited, also the harbour official of that port. A thorough inspection was made of the vessel and appreciation of her qualities was expressed.

The "Beaverburn" is the first of five fast cargo vessels, which will be known as the "Beaver" class, displacing 10,000 tons and having a length of over 400 feet. These ships are capable of making the ocean passage in ordinary weather conditions at an average speed of fifteen knots. The "Beaverburn" however, attained a speed of 16 knots on her trial trip.

These cargo ships will provide a weekly departure from Canada every Friday, arriving in London nine and a half days later. Montreal is to be their Canadian port during the summer and Saint John in the winter. The liners are considered the finest and highest class of cargo ships afloat today. Another steamer

of the passenger style, the Duchess of Bedford will be launched at the Cyclobank shipyards January 24. Altogether there are to be five Duchess liners attached to the Canadian Pacific Steamships. To date the Duchess of Athol has been launched. The Duchess of Bedford will be launched shortly, while in 1929 the third and fourth to be delivered will be Duchess of Richmond and Duchess of Cornwall, with one more ship to come.

## VIKING

Charlie Brickman is a patient in the local hospital.

John Bomas left for the city Monday evening for a few days stay.

Mrs. Charlie Thorsen is a patient in the local hospital.

Albert Barber is a patient in the local municipal hospital.

Mrs. N. C. Graham entertained at three tables of bridge last Friday evening.

Mr. Peck and Mr. Hall of the city came down last week to look over land in the local district.

W. G. Smith horse buyer shipped four carloads of horses to the city Monday.

Mr. and Mrs. Skinner and Mr. and Mrs. Dupre motored to the city Monday for a few days stay.

Mr. and Mrs. D. Wemp returned on Tuesday after spending six weeks at the coast.

Mr. and Mrs. R. W. Runyon are spending a few days in Edmonton and Leduc this week.

Mr. Thos. Miller, of Calgary, representative of the Ford Motor Co., has been in town this week.

A forage crop train is billed to be here on Thursday of this week under the auspices of the department of agriculture and the C. N. R. The exhibition opens at two P. M.

Mrs. Elsie McLuhan, reader and impersonator, will be here on February 22nd, under the auspices of the Women's Institute. Watch for further announcement.

Word has been received that Miss Mae Boe and Donald Boe of Sioux City, Iowa, daughter and son of Rev. Mr. T. T. Boe, of this place, underwent an operation for appendicitis last week which were successful. Miss Boe recently graduated from the Central High school, of that city.

The Viking municipal hospital is at present crowded to more than capacity and it begins to look as if an addition will have to be built in the near future so that the district may be adequately served in time of need. At present every bed is occupied and some extra cots are being utilized.

From the many adverse reports being broadcast in regard to conditions alleged to be in existence in some of the municipal hospitals throughout the province, the Alberta government should look around for a competent supervisor at once. This is a medical man's job and not a political plum.

The annual Father and Son celebrations held at the week-end were a great success. On Saturday evening about sixty fathers and sons sat down to an excellent dinner provided by the mothers in the United Church Hall. Lane McAthey was chairman of the evening's program, which was commenced with the Trail Rangers opening ceremony led by Jack Skallitzky. After a jolly sing song, George Campbell gave a very fine report of his visit to the Boys' Parliament in Calgary. Mr. Swift told a very suitable story implying co-operation and Individual-Service as necessary to success in Boys' Work. Mr. Bainbridge made some announcements and proposed a Vote of Thanks to the mothers.

The Sunday Evening Service at the United Church was conducted by the C. S. E. T. boys. George Campbell was Chairman, while Lane McAthey Howard Armstrong and Earl Hardy all took respective parts in the service. Mr. W. H. Swift gave a very suitable and comprehensive address on "Boys Work as it helps in the development of Character." The orchestra played for the Service.

The Annual Star Share Selling campaign for our Provincial C. G. I. T. organizations will continue until February 11th. We are on a fair way to raise our objective of \$150.00. If everyone helps it will be reached.

## MISS KATHLEEN GILPIN WINS ESSAY PRIZE

Miss Kathleen Gilpin won first prize at the Provincial Seed fair held at Calgary last week for an essay on Weed Control and Eradication with special reference to Sow Thistle. She also took a prize for collection of weeds and weed seeds.

We take pleasure in publishing the prize winning essay as follows:

## WEED CONTROL

AND ERADICATION  
The following suggestions may help those whose farms are not already polluted.

1. Wheat may be absolutely cleaned by using a Dred Grain Cleaner.

2. Buy oat seed free from Wild Oats. They can be secured from the Alberta Government seed cleaning plant.

3. Beware of impure grass seed, (particularly Rye Grass) on account of Couch Grass.

There are two general methods of weed control on great farms. These are sod farming and growing green.

Red or other quick growing crops.

Cultivate between harvest and end of May to start weeds. Plow early in June and either sow the crop or commence cultivating. For Canada Thistle, grow the crop, cut when in bloom, and plow again in the fall. This is also good practice for Sweet Grass and to some degree for Quack Grass.

For Sow Thistle (after pollution is bad) and all other common weeds, use summerfallow and keep it black.

I would say Black, Black, BLACK, if there is Sow Thistle. One additional precaution should help for wholesale crops of Sow Thistle. Plow immediately crop is off.

The real essential for the eradication of weeds is the proper frame of mind in all people.

A feeling of strife, war with the weeds, personally and collectively, should be stirred up. Those who have no community spirit should be appealed to through their avarice, fear of loss and fear of ridicule. After the scare is thrown into them teach them how to locate new weeds of all kinds.

A Sow Thistle in a glass case should be kept in every house. Lacking that, examine Stewmen. No. 1 is in my collection. Each child and farm hand should be paid for locating specimens. When the first plants of Sow Thistle have been found, a spade, preferably a long tile spade, is the only efficient implement. Put a very careful man on the end of it and say "don't leave none."

## WORLD HAPPENINGS BRIEFLY TOLD

Chambers' "Chum-Chum" third attempt to capture the Soviet's duration fight would have failed when he was forced down by his enemies on the wings.

Delegation at Washington of a new national state of Samuel Gompers, former president of the American Federation of Labor, is proposed. The delegation is expected to arrive in Washington, D.C., on Jan. 21, 1928.

Extended for more than twelve hours by a fall of coal in a level hundred feet beneath the surface, nine miners at Hazleton, Pa., were rescued from their prison and brought out of the mine without a scratch.

The British Ambassador, Sir George Buchanan, of South Africa, which began in 1921, will be extended for two years from Jan. 21, 1928, at the special request of the South African Government and with the approval of the king.

"The Repentant Magician" by Paul Verneux, a picture which exhibits the work of the great Venetian master in the first flush of his maturity, about the year 1555, has been purchased by the Canadian National Gallery.

The Alberta Wheat Pool has secured a contract in the Northern Cereals Commission Company, Ltd., and J. W. Brewster, Vancouver, for its terminal elevator at Vancouver, which is to be completed and placed in operation by September 1, 1928, and having a capacity of 250,000 bushels.

One Shad, the oldest Indian on the Flood Reservation and the only remaining Indian that signed Treaty No. 7 in 1877, died at his home on the Flood Reserve, near MacLeod, Alta. He was 85 years of age and was buried near his home at the old agency on the reserve.

The official Gazette announces that the king has made Baron Byng of Vimy, former governor-general of Canada, a viscount. Viscount Byng received this honor in his 65th year, after an active military career which ended with the close of the war. He was governor-general of Canada from 1921 to 1926.

## Air Route Via Yukon

### Treat Northern Airway Is Predicted

By Dr. Thompson  
The Yukon will some day be one of the main air routes of the world, providing an airway between Asia and Europe, if the prediction of Dr. Alfred Thompson, former minister of parliament for the Yukon, comes true.

"The airway will be routed through the Northern part of British Columbia to the Yukon to the Alaskan Islands," said Dr. Thompson. "With Siberia in the North and China, Japan and the Philippine Islands to the South, the route will be free from fog, wind or snow. Airships will probably be the main means of travel, and stations will be established in the summer months in the Yukon when the rivers are open."

## Future Of The North

The Hudson's Bay Railway is an absolute necessity to the north country, states Senator George Gordon of North Bay. "Even were it not possible to transport grain over the railroad," he said, "it will still be an enormous factor in opening the mining country." He advised young men today to go north, where the future of Canada, to a great extent, lies.

Time was when banks occupied all the best corners in our town and cities, but service stations seem to adorn them now. Perhaps that indicates where the money is going.

## Foresees Atlantic Air Service

Dominion Secretary Predicts Edmonton Will Be Northern Depot

The Rt. Hon. L. C. M. R. Amery, British secretary of state for Dominion Affairs, foresees the day when Edmonton will be the northern depot for a great British air line service across the Atlantic, north through the Peace River country and across the Rockies to Vancouver.

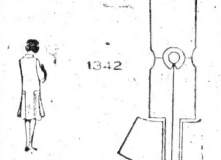

"It is not generally realized," he said, "that only the development of an air line across the Atlantic will show it, that Churchill is as near to London as is Montreal; that Edmonton is as near to London as is Toronto, and that practically all of Canada is nearer to London than is New York."

Experimental air line service will be commenced in the summer of 1928, Amery said. It will be three or four years yet before there is a regular air line service across the Atlantic, and there is yet to be much experimenting in measuring the distances for such a comparison of distances to the west, the possibility of an all year air crossing of the dangerous and forbidding territory of Iceland and Greenland.

Passenger and mail service will first be developed, followed by the carrying of precious cargoes such as gold, gems, and the like on which insurance charges are extremely heavy for each hour of transportation.

One line, surely is being laid by the British air industry, for commercial and military tests and studies for passenger and cargo work is being laid by Col. Murray for a private company.

## A CANADIAN RIVER THAT LOSES ITSELF

Maligne River, In Jasper National Park, Has Interesting Feature

A river that loses itself in complete mystery is to be found in the world. The name of this river is the Maligne, French for "evil" and "given to it because where it joins the Athabasca there was a feud which was much feared by the trappers and voyageurs of early days in western history.

The Maligne River finds its source in Medicine Lake, about thirty-five miles from its mouth, with the Athabasca. Maligne Lake, its shallow, forty-two miles long, more than a mile wide and the largest glacial fed body of water in the Canadian Rockies. From this lake the Maligne River flows gently down-hill for about fourteen miles to empty into Medicine Lake, a body of water four miles long and from a half to a mile wide. This lake, in some places, reaches a depth of 150 feet.

Out of this lake there is no known outlet. At the foot of it and for a mile or so below there is the dry course of what was once a river. But this bed is dry and there is neither sight nor sound of water in or near it. After about a mile a trickle of water makes its appearance and within a comparatively short distance a river is once more flowing through the valley.

This is again the Maligne River, although from this point to the Athabasca, the volume of water is never as great as that which flows into Medicine Lake. A mile above the Athabasca River, the Maligne has itself down into a great canyon, hundreds of feet deep and, in places, less than a yard wide at the top.

## London-Dublin Air Service

Would Cut Journey From Ten To Four Hours

An air service between London and Dublin is the object of negotiations now in progress between Imperial Airways, Limited, and the Air Department of the Irish Free State. Passengers would fly from London to Liverpool, they would change from land-plane to a 16-passenger flying-boat. The aerial journey should be accomplished in about four hours, compared with ten hours by boat and train.

Some people are proud of their past—probably because it is past.

## Receives New Appointment

A. Ledingham who was recently appointed assistant general freight agent of Western Lines of the Canadian Pacific Railway with headquarters at Winnipeg. Mr. Ledingham was, prior to his recent appointment, was city freight agent, and the service of the Canadian Pacific in 1927, and has been identified with the freight department since that time. His first services were at the time of 1911, when he remained in 1911, when he was appointed chief clerk in the office of the assistant freight manager. In 1913 he was appointed contracting freight agent and in 1914 he was appointed chief clerk in the office of the freight manager. His entire experience has been with western lines of the company.

## International Friendship

Exchange Of Visits Between Canada and United States, Creates Good Feeling

The significance of the many recent exchanges of official and unofficial cordials between Canada and the United States was emphasized on Monday, when the Canadian Club, Montreal, by Hon. William Phillips, United States Minister to Canada.

Mr. Phillips referred to the visit of President Harding to Ottawa at the time of the diamond jubilee celebration in July, the dedication of the new bridge across the Niagara River in August, the erection and unveiling of the monument to United States soldiers who fell while serving in the Canadian army during the war in Arlington Cemetery, the laying of a wreath upon the altar of remembrance at Ottawa by himself, and the visits to Washington of the Governor-General and Lady Willingdon, and Premier King.

Mr. Phillips reminded his audience that these personal visits were to be returned in February by the United States Secretary of State, Hon. Frank B. Kellogg.

## Saskatchewan Honey

Saskatchewan honey production has grown from 24,000 pounds in 1922 to 509,974 pounds in 1927, according to a report issued by the field crops branch of the provincial department of agriculture. The 1927 production was made up of 64,942 pounds of comb honey and 436,932 pounds of extracted honey.

## Briquelette Plant

British Capital For Extension Work At Bismarck, Sask.

Tenders are being called for by advertisement in the British newspapers for machinery in connection with the brick-making plant at Bismarck, Ernest Bury, well-known English engineer and manager during the reconstruction of the plant for the Western Dominion collieries, a syndicate of British capitalists, proposes coming out early in the New Year, according to information received by Commissioner T. M. Stolley, of the Saskatchewan Bureau of Labor and Industries. It is understood that Mr. Bury will be in the province for a period of from five to six weeks to supervise matters in order that the new plant may be successfully coupled up to the existing system at Bismarck.

## Find Germ Of "Moon Blindness"

May Be Possible To Produce Serum To Stop Disease

Discovery of the bacteria which is believed to cause "moon blindness" in horses, and which results in the death of many valuable animals, was announced recently by Dr. Edward C. Rosebury, of the Mayo Foundation, Rochester, Minnesota. Speaking before the 29th annual meeting of the Society of American Bacteriologists, Dr. Rosebury declared that through tests and experiments he had found an organism which injected into animals, produced symptoms identical to this disease.

Dr. Rosebury said if further tests corroborated his findings, it should be possible to produce a serum to stop the spread of the disease.

## Experiment Was Success

London Garden Thrives 170 Feet Above Thames

When a garden was planted on the roof of Adelphi house, close to London Bridge, many thought it a foolish idea to expect fruit trees, shrubs and delicate plants to grow on a roof 170 feet above the Thames and exposed to cold east winds. But Sir John Burnet, architect, had carefully planned a flat roof and provided some protection against the wind. The results are surprising. Not one of the 10 fruit trees planted has died, and there has already been a crop of cherries and pears. There is also an 18-hole putting green.

## Manitoba Industries

Last year 22 new industries began operations in Winnipeg and district, and 21 existing industries in the city and its environs enlarged their plants. It is estimated that the total value of the output of industrial plants in Manitoba in 1927, was about \$170,000,000.

The farthest north police station in the world is on Herschel Island in the Arctic Ocean, a post of the Royal Northwest Mounted Police.

There are men with whom an hour's talk will weaken one more than a day's fasting.

Many a reputation has been gained without merit and many a one lost without fault.

## View of London District Where Thames Floods Caused Much Suffering

Old London from Canning Town in the east to Hammersmith in the west, for a large distance on both sides of the Thames, was under water when the river overflowed its banks. Intense suffering was entailed in the crowded poorer sections in the east end, while many famous buildings such as the Tower of London and Lambeth Palace were inundated. In the above photo a section of the flooded area is shown. In the foreground in Tower Bridge leading to the Tower of London where soldiers were mustered to guard the crown jewels. Beyond the bend in the river is the Victoria Embankment over which the water poured like a waterfall.

**SCOTT'S EMULSION**

## SAYS TRAINS ARE SAFER THAN AUTOS

### Railways Are Not Dangerous Says Railway Official

"The most dangerous part of the machinery of transportation is, the man that holds the steering wheel of the automobile," says W. Jones, of Montreal, Assistant to the Director of Safety and Control on the Canadian National Railway. Speaking in Winnipeg at the recent presentation of 150 certificates, vouchers, medals and labels, as well as a number of special prizes to Canadian National employees who had won them through proficiency in First Aid work and home nursing, Mr. Jones declared that the system spent a good deal of money and energy in protecting people who neglected to protect themselves.

"Railways are not dangerous," said he. "It was once thought they were, and perhaps this was true, but today there is not a safer avocation in the world. We are highly organized and ready for any emergency. The danger of accident comes from the general public, which is not yet educated away from the carelessness and recklessness."

"Among its employees the National system stimulates an interest in First Aid work, and I think I may say our department has succeeded in 24 of 25 cases when I tell you that of the 93,000 on the system more than 37,000 are ready to give first aid to the injured promptly when the occasion demands it. And every year sees an increasing membership in the Canadian National branch of the St. John Ambulance Association."

"Next to First Aid, and perhaps even before it," said Mr. Jones, "is Safety First. This I call first aid to the untrained. Some day we shall get the careless motorist to see that it is better to be safe than sorry."

## Do Not Eat Turkey

### Little Demand In New Zealand For This Fowl

There are about 7,000 turkeys in New Zealand, but very few are sold, according to a report contained in the National Poultry, Butter and Egg Bulletin. There is little demand for this fowl and this is more than taken care of by the local producers, states Trade Commissioner Julian D. Foster, in a report to the Department of Commerce. New Zealand gobblers generally cost from \$2.50 to \$3.00, according to weight; hens cost about \$2.40 and younger birds from \$1.70 upwards. New Zealanders are rarely missing something besides winter at Christmas.

A "dime" was originally a tenth of a man's earnings paid as church dues.

A California catfishery has an output of three million chub a year.

## HEART WAS SO WEAK Had to Stay in Bed

Mrs. F. Wilson, Lethbridge, Alta., writes: "My heart was very weak, and I had to stay in bed for five weeks with it."

"My next advised me to take

as she had taken them with good results after a very bad operation. "I took them and some time after a doctor came to examine me for life insurance and he said there was nothing wrong with my heart."

Milburn's Heart and Nerve Pills are sold at all druggists and dealers, or by mail direct on receipt of price. The T. T. Milburn Co., Limited, Toronto, Ont.

## Main Street

Born to Mr. and Mrs. Geo. Podel Monday, February 6th, a son.

Mr. C. J. Young returned Thursday after spending a month in Edmonton.

Mr. T. Knowles returned Monday after spending a week in Edmonton.

Mr. and Mrs. Jack Fletcher spent Tuesday and Wednesday in Edmonton.

Tuesday night Mr. Jas. Lennon and his son Leslie left on a trip to Vancouver Island.

Mr. J. H. Elliott and Mr. A. A. Fischer are attending the Fairs convention at Edmonton this week.

Miss H. Greer has accepted a position with Mrs. Mackenzie of Wainwright.

Mr. W. H. King and Mrs. A. W. Burton left Wednesday night to spend a few days in Edmonton.

Mr. and Mrs. Atkinson returned Monday after spending a week in the City.

Mr. and Mrs. P. J. Hardy was in the city the first of the week attending the Chevrolet convention.

Mr. R. Forrest returned Monday after attending the Dairy convention at Calgary last week.

The John Deere machine company are holding a tractor school at Wainwright Tuesday, February 14th.

Mr. E. L. Elford and Mr. L. L. attended the Chevrolet convention at Edmonton Tuesday.

Miss Georgina Fenton, teacher at Phillips spent the week end with her parents at Irma.

The Irma Ladies Aid are putting on a skating carnival on Friday evening, February 17th at the rink.

Mr. Percy Jones has purchased the N. E. quarter of Section 27-16-9, with, and is looking for some one to cut brush so he can start breaking in the spring.

Mr. Ed. Levens, former harness maker at Irma is spending a couple of weeks here, renewing acquaintances. Mr. Levens intends returning to B.C. about the end of the month.

A Ford demonstration car was in Irma last Wednesday and created a considerable amount of interest, many people being given demonstration rides.

A very enjoyable evening was spent at the home of Mr. and Mrs. J. C. McKay last Friday, February 3rd when they entertained a few young folks of the district.

Mrs. McLuhan, impersonator and reader will pay a return visit to Irma during the latter part of February, under the auspices of the Women's Missionary Society. Watch for further announcement next week.

Mr. Ellsworth Goodale and his outfit is expected home Saturday after spending the winter at Cheecham, where they have been drawing fish from some of the northern lakes to the railway.

Mr. R. Foreman returned from Edmonton Wednesday where he has been staying with Mrs. Foreman who was taken to one of the hospitals a few days ago. Wednesday morning Mrs. Foreman was very low and the doctors could give very little hope of her recovery.

### PRODUCING MILK

Among my neighbors is a chap with such a friendly, genial map, his milk cows do not care a rap for any stunt he pulls. And all his cattle like him so, they just produce good milk and grow—the things he wants they seem to know, from new born calves to bulls. If some old rip, some bovine yegg, should blaze away and break a peg for this old boy, he'd rub HER leg and say: "So, bossy cow!" He never lets his temper rise, the piece that from his shin bone flies brings forth a look of mild surprise upon his classic brow. He rubs her gently on the back and doesn't yearn to take a crack at her old bean, nor yet to hack a roast from off her loin. He says: "Such actions do not pay; you can't make cows give milk that way, and I work sixteen hours a day to gather in some corn." He says that dogs were likely fine in sixteen hundred ninety-nine, but no hamstringing bounds for mine, in nineteen twenty-eight. His cows stroll homeward twice a day to get their greens and pickled hay, he has to beg them not to stay when all the chores are through. This man is healthy, rich and wise; he has a wife of ample size and kids that take a country prize when competition's hot. He lives on cream and cherry pies and when this model farmer dies he'll win a mansion in the skies besides the one he's got.

## Here and There

Hamilton's air port comes in operation May 1st. The project used is four hundred acres is extent. A large hangar is being constructed and the old homestead on the property will be remodelled as an aviation boarding school.

Driven by over-population to eating bark of trees and seaweed from the ocean, the wild goats of Gualoupe Island are changing their habits and, in some respects, their form. They are learning to climb leaning trees in search of foliage.

According to recent game regulations in the Province of Alberta prairie chicken, grouse, partridge greater and lesser yellow legs, black breasted and golden plover, are now on the protected list, while the baron Hungarian partridge, north of the North Saskatchewan River, has been lifted.

It has been announced by Premier Ferguson, of Ontario, that the Government proposes to foster the creation of an industrial research institution with an endowment of \$2,500,000 for the purpose of solving scientific problems of production and process for Canadian industries.

While on a tour of the Maritimes recently, Dr. F. T. Wahlen, chief of the seed branch of the Department of Agriculture at Ottawa, was of the opinion that a great deal more of the seed used in those provinces should be grown on their own farms. The seed is very hardy, he declared, and, with proper care, a market could be established in the northern states of the Union, and the crop profitably disposed of.

The versatility of the seaplane was ably demonstrated recently. C. F. Tennesson, a Swedish sea captain, with urgent business in Shanghai, was taken from the Canadian Pacific Toronto Express at Mission City, B.C., and rushed by seaplane to the outer wharf at Vancouver, where he caught the flagship of the Canadian Pacific fleet, the "Empress of Canada" for the Orient. The seaplane was landed on the Fraser River within easy reach of the depot.

OFF TO EDMONTON BONSPIEL Two rinks are away tonight to take part in the Edmonton bonspiel which opens on Thursday of this week. One rink is composed of J. L. Slavik skip, N. C. Graham, V. A. Hardy and P. A. Main. The second rink is W. McAthey skip, H. G. Thaneil, Fr. Rockwood, and Thos. Hoskins.
